

# Introducing Outcomes and Casemix Measures into Team Reviews: Child and Adolescent Services

---

*“Sharing Information to Improve Outcomes”*  
*An Australian Government funded initiative*

# Rating the HoNOSCA

				Monitor ?	Active treatment or management plan ?
Clinically Significant	4	Severe to very severe problem	Most severe category for patients with this problem. Warrants recording in clinical file. Should be incorporated in care plan. <i>Note – patient can get worse.</i>	✓	✓
	3	Moderate problem	Warrants recording in clinical file. Should be incorporated in care plan.	✓	✓
	2	Mild problem	Warrants recording in clinical notes. May or not be incorporated in care plan.	✓	✓
Not Clinically Significant	1	Minor problem	Requires no formal action. May or may not be recorded in clinical file.	Maybe	✗
	0	No problem	Problem not present.	✗	✗

AMHOCN

# **Outcome measures in team reviews: Getting started**

# Embedding the measures in team reviews

- Staff have received adequate training in relation to NOCC.
- The use of outcome measurement is documented in appropriate policy and procedures.
- A system for regular review of all consumers via team reviews is established.
- Prior to team reviews, case managers are informed which consumers are due for review.
- Case managers ensure the NOCC measures are completed prior to review.
- NOCC reports are available during team reviews.

AMHOCN

# Activity 1

## Case presentation

- Small groups
- Discuss case presentation during team review meetings
- Use the ratings on measures to identify key issues for the consumer and options for interventions

# Using the measures in team reviews

# Activity 2

## Case presentation and care plan

- In small groups
- Review the case study
- Spokesperson presents the case study your group has been given
  - Where does the consumer have problems?
  - Where are their strengths?
  - How does this information inform the care plan?
  - What is the plan of care?

# Summary

AMHOCN

- The NOCC measures make overt the clinician's assessment of the consumer, helping to identify specific areas where the consumer will require support and determining key areas of strength which can be harnessed to support consumer recovery.
- The measures can be used to support care planning and monitoring change over time.
- The measures provide a framework for case presentation during team reviews, introducing a broader range of domains into the review discussions, rather than focusing on symptoms.
- Team reviews provide the opportunity to discuss the reasons for the ratings on measures such as the HoNOS and exploring, in a constructive way, any differences of opinion. This supports improvements in the consistency of ratings.
